One despatch from Athens, however, says the Greek cabinet is disposed to accept the conditions laid down by the entente powers except the condition requiring Greece to participate in the war, and that a solution of the whole difficulty may be expected immediately.

The British and French forces daily are being strengthened by men and guns landed at Saloniki and part of the reinforcements are being sent to Monastir where the Serbians also are reported to be concentrating and threatening the Bulgarians at Prilep.

Rumania in Same Position as Greece. Rumania finds herself in much the ame position as Greece, with both the antente allies and the central powers bringing pressure to bear upon her. The Germans, it is said, are asking Rumania to give assurances of her continued neutrality and also are offering her concessions if she intervenes in the war on the side of the Teutonic allies. On the whole, it is expected here that the firm attitude of the entente powers toward Greece will clear the Balkan situation before very long.

Little News from Battlefields. There is little news of importance from any of the other fronts. The Italians by their continued offensive are strengthening their positions around Gorizia, which, it is believed, cannot hold out much longer. On the cannot hold out much longer. On the western front the British and French artillery has become more active in Flanders and Champagne, which on previous occasions has been the signal for offensive movements. The Russians, since they regained the ground they lost along the Styr river, have been inactive, except for minor attacks in the Dvinsk region.
